Office of the Superintendent

March 12, 2020
6:30 p.m.

Dear San Dieguito Union High School District Community,

District leadership participated in today's conference call updating us on the San Diego County response to Coronavirus. No new guidance was issued, however, earlier guidance was reiterated. San Dieguito Union High School District is not creating the guidance documents, they are being created and issued by the State of California Department of Public Health and San Diego County Health and Human Services Agency. These guidance documents include the circumstances under which a school can be closed due to a public health risk. We are required to follow this guidance and authority.

We understand this is a difficult time and there are many opinions as to how we should proceed. Our decision-making, and the decision-making authorities issuing the guidance documents, all have the health and safety of our students, families and community as the highest priority.

We will receive another update tomorrow afternoon. If there is any change to the guidance we will provide an update.

Robert A. Haley, Ed.D.
Superintendent
Committed to the Future
