

HEALTH EXAMINATIONS**VISION AND HEARING TESTS**

Students shall have their vision and hearing tested by qualified personnel authorized by the district. (Education Code 49452, 49454)

All students shall be tested for visual acuity when they first enroll in elementary school and at least every three years thereafter until they complete grade 8. Gross external observation of the student's eyes, visual performance, and perception shall be made by the school nurse and the classroom teacher. (Education Code 49455)

Evaluation of a student's vision may be waived at the parent/guardian's request if the parent/guardian presents a certificate from an authorized health care provider specifying the results of an examination of the student's vision, including visual acuity, and, in male students, color vision. (Education Code 49455)

Visual defects or any other defects found as a result of the vision examination shall be reported to the parent/guardian with a request that remedial action be taken to correct or cure the defect. The report of a visual defect, if made in writing, shall be made on a form prescribed by the Superintendent of Public Instruction. (Education Code 49456)

Such reports shall not include a referral to any private practitioner. However, the student may be referred to a public clinic or diagnostic and treatment center operated by a public hospital or by the state, county, or city department of public health. (Education Code 49456)

SCOLIOSIS SCREENING

Each female student in grade 7 and each male student in grade 8 shall be screened for scoliosis. This screening shall comply with California Department of Education (CDE) standards and shall be performed by qualified personnel as specified in law. (Education Code 49452.5)

Persons performing the screening shall not solicit, encourage, or advise treatment of the student for scoliosis or any other condition discovered in the course of the screening. (Education Code 49452.5)

The parent/guardian of any student suspected of having scoliosis shall receive a notice which includes an explanation of scoliosis and describes the significance of treatment at an early age. This notice shall also describe the public services available for treatment and include a referral to appropriate community resources. (Education Code 49452.5)

TYPE 2 DIABETES INFORMATION

Because type 2 diabetes in children is a preventable and treatable disease, parents/guardians are encouraged to have their child screened by an authorized health care practitioner for risk factors of the disease, including excess weight, and to request tests of their child's blood glucose to determine if he/she has diabetes or pre-diabetes.

The Superintendent or designee shall provide parents/guardians of incoming students in grade 7 with an information sheet developed by the CDE regarding type 2 diabetes, which includes a description of the

disease and its risk factors and warning signs, a recommendation that students displaying or possibly suffering from risk factors or warning signs associated with type 2 diabetes be screened for the disease, a description of the different types of diabetes screening tests available, and a description of treatments and prevention methods. The information sheet may be provided with the parental notifications required pursuant to Education Code 48980. (Education Code 49452.7)
