

STUDENT PRODUCTION OF SERVICES AND MATERIALS

Students may produce services and materials in the schools only when such production furthers such student's educational development.

Costs of services and products produced in school shops and laboratories, for non-school use or consumption, shall be borne by the user or consumer when such costs are over and beyond normal instructional and material costs.

Priorities for availability of services and products for non-school use (such as servicing automobiles in vocational shops) shall be:

1. Students of the schools.
2. School system employees. (Because of the possibility of charges of conflict of interest, this second category should be utilized with great care.)
